2. [redacted] Frankfurt/Oder railroad station, supplement by personal observations of source, the following Soviet supply shipments entered the Soviet Zone en route from Brest Litovsk:

Date in June	Number and Type of Cars	Load	Dispatched to
18	38 F	38x3.1-ton trucks	Fuerstenwalde
	11 B	ammunition	Wulkow

	25 F	25x3.1-ton trucks	Zeithain
	30 F	30x3.1-ton trucks	Magdeburg

[redacted] (10) and (12)

[redacted] Comments.

(1) Raw material deliveries for the Foundry Combine East which is served by the Ziltendorf railroad station.

(2) These shipments were connected with the vehicle replacement program of the Soviet occupation force.

(3) Refrigerator trains operating between the U.S.S.R. and the Soviet Zone of Germany. [redacted]

(4) Deliveries by Soviet Zone hydrogenation plants to the U.S.S.R. and returning empty tank cars.

(5) Grain shuttle trains. [redacted]

(6) The number of tank shipments from the U.S.S.R. to Germany increased. This was expected after the dispatch of a sizable number of empty heavy-duty flatcars from Germany to the U.S.S.R. As entire units of the Volkspolizei are stationed at the places to which these tanks were dispatched, it may be assumed that they were for the Volkspolizei.

(7) It is believed that this equipment was for the reconstruction of power stations required for the intended re-electrification of railroad lines in the Halle railroad district.

(8) A large spare parts depot of the 123d Tank Repair Shop is located in Muellrose, and an ordnance depot of the GOFO is in Jessen.

(9) Deliveries of Soviet Zone railroad car factories to the U.S.S.R. The attached flatcars were loaded with Soviet-gauge wheel sets to be used on the Soviet railroad system.

(10) [redacted]

(11)

(12) Except for the shipment of ammunition observed on 18 June and that of military goods observed on 19 June, all the shipments listed in paragraph 2 were reported previously.
